General Intelligence and Reasoning

Master General Intelligence for SSC CHSL Success!

DEFINITION

General Intelligence and Reasoning tests your logical thinking and problem-solving skills. It's crucial for SSC CHSL as it assesses your ability to analyze and interpret information.

KEY CONCEPTS

Analogies

Finding relationships between pairs of words or phrases to solve problems.

Series Completion

Identifying patterns in a sequence of numbers or letters to predict the next item.

Classification

Grouping items based on common characteristics or attributes.

Syllogisms

Drawing logical conclusions from given statements or premises.

Blood Relations

Understanding family relationships and connections through given information.

EXAMPLES

→ Dog is to Bark as Cat is to Meow.

→ Find the next number in the series: 2, 4, 6, 8.

→ Which word does not belong: Apple, Banana, Carrot, Grape?

MEMORY TIPS

★ Use the acronym 'A-S-C-B-S' for Analogies, Series, Classification, Blood relations, Syllogisms.

★ Visualize relationships in blood relations using a family tree diagram.

★ Practice with puzzles to enhance pattern recognition skills.

COMMON MISTAKES

✗ Rushing through questions without analyzing all options.

✗ Misinterpreting the relationships in analogies.

✗ Neglecting to double-check answers in series completion.

QUICK RECAP

General Intelligence and Reasoning is essential for SSC CHSL. Focus on understanding relationships, patterns, and logical deductions to excel in this section.
