General Intelligence and Reasoning

Master General Intelligence for SSC GD Success!

DEFINITION

> General Intelligence and Reasoning tests your ability to think logically and solve problems. It includes various types of questions that assess analytical and decision-making skills.

KEY CONCEPTS

Analytical Reasoning

This involves breaking down complex information to understand relationships and draw conclusions.

Logical Sequences

Identifying patterns in sequences of numbers or letters to predict the next item.

Syllogisms

Drawing conclusions from two or more statements based on logical reasoning.

Non-Verbal Reasoning

Using visual and spatial reasoning to solve problems without words, often through shapes and patterns.

Coding-Decoding

Interpreting and converting information from one format to another using specific rules.

EXAMPLES

→ If A is taller than B and B is taller than C, who is the tallest?

→ Find the missing number in the series: 2, 4, 8, ?, 32.

→ If CAT is coded as 3120, how is DOG coded?

MEMORY TIPS

★ Use the acronym 'A-L-S-N-C' to remember key concepts: Analytical, Logical, Syllogisms, Non-Verbal, Coding.

★ Visualize sequences as a staircase to remember the order of numbers or letters.

★ Create a story around syllogisms to make them more relatable and easier to recall.

COMMON MISTAKES

✗ Rushing through questions without analyzing all options carefully.

✗ Forgetting to apply logical rules consistently in syllogisms.

✗ Overlooking visual cues in non-verbal reasoning questions.

QUICK RECAP

General Intelligence and Reasoning is crucial for SSC GD exams. Focus on understanding patterns, logical deductions, and practice regularly to enhance your skills.
