What is Private Information

Protect Yourself: Know What Private Information Is!

DEFINITION

> Private information is personal data that can identify you, like your name or address. Keeping it safe online helps protect your privacy.

KEY CONCEPTS

Personal Details

This includes your full name, home address, and phone number.

Financial Information

Details like bank account numbers or credit card information should be kept secret.

Passwords

Your passwords are private and should never be shared with anyone.

Location Data

Sharing your current location can put you at risk; keep it private.

Social Media Privacy

Be careful about what you post online; it can reveal private information.

EXAMPLES

→ Sharing your home address online.

→ Posting your school name and location on social media.

→ Giving your password to a friend.

MEMORY TIPS

★ Think 'PFL' - Personal, Financial, Location for private info.

★ Use the acronym 'SPLAP' - Social, Passwords, Location, Address, Personal.

★ Visualize a locked box for your private info; only you have the key.

COMMON MISTAKES

✗ Thinking all information online is safe to share.

✗ Not using privacy settings on social media.

✗ Ignoring friend requests from strangers.

QUICK RECAP

Private information is anything that can identify you, like your name or address. Always keep this information private to protect your safety online.
