What is Non-Living Things

Discover the World of Non-Living Things!

DEFINITION

> Non-living things are objects that do not grow, reproduce, or need food. They can be natural or man-made.

KEY CONCEPTS

Natural Non-Living Things

These are found in nature, like rocks, water, and air.

Man-Made Non-Living Things

These are created by humans, such as toys, buildings, and cars.

Characteristics

Non-living things do not have life processes like growth or reproduction.

Difference from Living Things

Living things need food, water, and air, while non-living things do not.

Examples in Daily Life

Common non-living things include furniture, books, and electronic devices.

EXAMPLES

- → A rock in the garden
- → A plastic bottle
- → A wooden chair

MEMORY TIPS

- ★ Think of 'N' for Non-living and 'No' to remember they don't need food.
- ★ Use the rhyme: 'Living things grow, non-living things don't.'
- ★ Visualize a toy (non-living) versus a pet (living) to differentiate.

COMMON MISTAKES

- ✗ Confusing non-living things with living things, like a plant.
- ✗ Thinking all objects that move are living.
- ✗ Overlooking that non-living things can be made of living materials.

QUICK RECAP

Non-living things are objects that do not grow or need food. They include natural items like rocks and man-made items like toys. Remember, they are different from living things in many ways!
