Beginner lessons for Editing Basics

Master the Essentials of Photo Editing for Stunning Images!

DEFINITION

> Editing basics involve fundamental techniques to enhance and manipulate photos. These skills help improve image quality and express creativity.

KEY CONCEPTS

Cropping

Cropping removes unwanted parts of an image to focus on the subject.

Adjusting Brightness

Changing brightness helps to make images lighter or darker, improving visibility.

Color Correction

Adjusting colors ensures that they appear natural and vibrant in the photo.

Applying Filters

Filters can change the mood of a photo by altering colors and textures.

Sharpening

Sharpening enhances the details in an image, making it appear clearer.

EXAMPLES

→ Crop a landscape photo to highlight the sunset.

→ Increase brightness on a dark portrait for better visibility.

→ Apply a vintage filter to give a nostalgic feel to a photo.

MEMORY TIPS

★ Remember 'CBAFS' for Cropping, Brightness, Adjusting colors, Filters, Sharpening.

★ Think of editing as 'Tweak, Transform, and Tantalize' your images.

★ Visualize a photo as a canvas needing touch-ups.

COMMON MISTAKES

✗ Over-editing images, making them look unnatural.

✗ Neglecting to save original files before editing.

✗ Ignoring the importance of lighting adjustments.
